PROFESSIONAL SUMMARY

Software Engineering graduate with hands-on, **full-stack** experience across web and mobile from React/Next.js frontends to Node.js and Python (FastAPI) backends, plus React Native mobile development. Demonstrated ability to deliver production-ready systems, migrate legacy codebases to modern frameworks, and integrate AI/LLM APIs. Eager to contribute to a collaborative engineering team.

EDUCATION

COMSATS University Islamabad, Lahore Campus

Feb. 2022 – Jan. 2026

Bachelor of Science in Software Engineering | CGPA: 3.04/4.00

TECHNICAL SKILLS

Languages : JavaScript (React.js, React Native), TypeScript, Python, HTML/CSS, SQL (PostgreSQL, MySQL)

Frameworks : React.js, React Native, Next.js, Express.js, Node.js, FastAPI

Databases : SQL, MySQL, MongoDB

Tools : GitHub, Vercel, Expo, ClaudeCode, V0.dev, Cursor, GithubCopilot

EXPERIENCE

Escalo AI

Jul 2026 – Present

Full Stack Developer

- Migrating BizHub's legacy **Laravel backend to Python (FastAPI)**, rewriting REST endpoints and core business logic while preserving compatibility with existing web and mobile clients
- Building a **React Native mobile application** for BizHub, an automotive dealership management platform, implementing core screens and workflows from the ground up
- Collaborating with the founding team on architecture decisions as the company migrates to Python and React Native

Rhombix Technologies

May 2026 – July 2026

Software Engineering Intern

- Designed a normalized **MySQL database (3NF)** for a Student Management System with enforced referential integrity and indexed joins
- Built the backend's **Python (OOP)** object model and delivered the full system alongside a React frontend

PROJECTS

Cliniqly | SaaS Booking & WhatsApp Automation for Clinics | [Live](#)

- Building a **React Native mobile app** for Cliniqly, bringing the web platform's booking and dashboard features to a cross-platform mobile experience
- Built the **SaaS web platform** (Next.js, Node.js) enabling clinics to manage bookings, calendars, and client records from a single branded dashboard
- Integrated the **official Meta-approved WhatsApp Business API** to send automated appointment reminders and confirmations, reducing patient no-shows

Final Year Project - Code Smells Detection and Refactoring System

- Built a full-stack **Code Smell Detection & Refactoring System** (Next.js, Node.js/Express, Flask) combining **26 rule-based checks** with **2 fine-tuned transformer models** (Feature Envy, Complex Method), achieving **74.93% accuracy** on a benchmark-inflation-resistant evaluation
- Integrated an LLM-powered refactoring module (**gpt-oss-120b**) to generate targeted, context-aware refactoring suggestions for each detected smell

KicksHub | Full-Stack Sneaker E-Commerce Platform | [Live](#)

- Built a **production-grade e-commerce store** (Next.js, Node.js, Stripe, Cloudinary) handling **200+ products** with real-time inventory and multi-image galleries
- Implemented OTP-verified checkout, a role-based admin dashboard, **20+ RESTful API endpoints**, and an **AI-driven SEO pipeline** for 200+ product listings

CERTIFICATIONS

Deep Learning Specialization | Coursera / DeepLearning.AI

- Neural Networks and Deep Learning
- Improving Deep Neural Networks: Hyperparameter Tuning & Optimization
- Structuring Machine Learning Projects
